JIRA MAE P. VIAÑA

SENIOR SOC ANALYST | INCIDENT RESPONDER | WAZUH SPECIALIST | SOC TEAM LEAD

jiraviana@outlook.com | +639-6182-52802 / +639-5675-06208 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Cybersecurity professional with 3+ years of experience progressing from L1 SOC Analyst to Senior SOC Analyst, SOC Team Leader, and Incident Responder across MSSP and enterprise client environments. Investigated 60+ escalated incidents daily in an incident response role and monitored 200+ daily alerts in L1 operations. Specializes in Wazuh SIEM, Windows security telemetry, detection engineering, custom rules, endpoint monitoring, threat hunting, and MITRE ATT&CK-aligned investigation. Experienced in phishing, malware, account compromise, root cause analysis, containment, remediation, stakeholder reporting, analyst mentoring, and SOC workflow improvement. Builds and tests a multi-endpoint Wazuh home SOC lab to deepen hands-on engineering skills.

TECHNICAL SKILLS & SECURITY PLATFORMS

SIEM & Log Analytics: Wazuh (advanced hands-on), Microsoft Sentinel, Splunk, IBM QRadar, Devo, ELK Stack; log correlation, query development, detection rule tuning

Wazuh & Detection Engineering: Wazuh Manager, Indexer, Dashboard, Windows/Linux agents, custom XML rules, rule testing, Windows Event Logs, File Integrity Monitoring (FIM), VirusTotal integration, Microsoft Defender telemetry, MITRE ATT&CK mapping

Endpoint / EDR / XDR: CrowdStrike Falcon, SentinelOne, Cortex XDR, Microsoft Defender for Endpoint, Carbon Black, Sophos, ESET, Symantec Endpoint Protection

SOAR, ITSM & Case Management: Swimlane, Shuffle, IRIS, Spectra Analyze, ServiceNow, Jira, Jira Automation, ConnectWise, UVdesk

Email Security: Proofpoint, Mimecast, Microsoft Defender for Office 365, FortiMail, FortiMail X-Ray

Cloud & Identity: AWS, Microsoft Azure, GCP, AWS GuardDuty, CloudTrail, CloudWatch, VPC Flow Logs, IAM, EC2, S3, Microsoft Defender for Cloud, Conditional Access investigations

Network & Web Security: Wireshark, Burp Suite, Zscaler, Cloudflare, AWS WAF, Check Point Harmony, Symantec Secure Web Gateway; FortiGate and Palo Alto log investigation

Threat Intelligence & Malware Analysis: OpenCTI, IBM X-Force Exchange, Spur Intelligence, VirusTotal, urlscan.io, AbuseIPDB, Shodan, WHOIS, MXToolbox, ANY.RUN, Joe Sandbox, Hybrid Analysis, CyberChef, Ultimate Windows Security

Operating Systems & Lab: Windows 11, Windows Security Event Logs, PowerShell, Ubuntu Linux, Kali Linux, VMware Workstation Pro, SSH, NAT networking

Frameworks & Methodologies: MITRE ATT&CK, NIST CSF, Cyber Kill Chain, incident response lifecycle, threat intelligence lifecycle, IOC/TTP analysis, risk-based triage, threat hunting, RCA

PROFESSIONAL EXPERIENCE

Incident Responder | Treantly — Canada (Client: DeepSeas, United States) | Dec 2025 – Jul 2026

- Investigated and responded to 60+ escalated security incidents per day involving phishing, malware, credential compromise, suspicious authentication, and potential breaches.
- Owned incident validation and end-to-end response activities including scoping, evidence analysis, containment, mitigation, remediation, and post-incident review.
- Correlated SIEM alerts, endpoint telemetry, identity and sign-in logs, email activity, and threat intelligence to reconstruct attack timelines and assess impact.
- Performed root cause analysis and IOC investigations; coordinated blocking of malicious IPs, domains, hashes, and compromised accounts using security platforms, firewalls, and Conditional Access.
- Prepared incident reports and customer-facing remediation recommendations; collaborated with SOC teams and stakeholders to resolve escalations and improve alert quality.

Senior Security Transformation Analyst | Accenture — Philippines (Client: SanDisk, United States) | Dec 2025 – Mar 2026

- Investigated high-priority escalated alerts using SIEM logs, EDR telemetry, authentication events, and event correlation to validate severity and identify attack behavior.
- Supported containment and remediation of confirmed incidents and documented evidence, timelines, impact assessments, findings, and recommended actions.
- Coordinated complex investigations with L3 analysts, security engineers, and stakeholders while meeting response and documentation requirements.

SOC Team Leader | Socrates Cyber — Israel | Apr 2025 – Dec 2025

- Led daily SOC operations, reviewed analyst investigations and escalations, and maintained incident handling quality, prioritization, and SLA adherence.
- Mentored analysts in alert triage, threat hunting, IOC analysis, incident response, and investigation documentation across SIEM, EDR, email, cloud, and network sources.
- Coordinated containment and remediation; reviewed cases in IRIS, Jira, and UVdesk and identified detection gaps, recurring false positives, and tuning opportunities.
- Prepared operational security reporting on incidents, CVEs, vulnerabilities, and threat trends; improved workflows through Jira Automation and process documentation.

Senior SOC Analyst | Socrates Cyber — Israel | Aug 2024 – Apr 2025

- Conducted advanced triage and threat hunting across SIEM, endpoint, email, and network telemetry, investigating phishing, malware, suspicious authentication, and endpoint incidents.
- Analyzed Windows Event Logs, PowerShell and command-line activity, suspicious scripts, and user behavior; enriched IOCs through threat intelligence and malware sandboxes.
- Performed containment, remediation support, root cause analysis, and incident reporting; tuned alerts and improved investigation workflows with Jira Automation.

L1 SOC Analyst | Socrates Cyber — Israel | Mar 2024 – Aug 2024

- Monitored 200+ daily alerts, performed first-line investigation, assessed threat indicators, prioritized incidents, and escalated confirmed suspicious activity.
- Used Splunk, Microsoft Sentinel, Wazuh, and ELK Stack for SIEM investigations and CrowdStrike, SentinelOne, Cortex XDR, Defender, and Sophos for endpoint analysis.
- Investigated email, cloud, and network security alerts; enriched indicators with VirusTotal, AbuseIPDB, IBM X-Force, Shodan, and other OSINT tools.
- Documented cases in IRIS, Jira, and UVdesk and supported security monitoring across AWS, Azure, GCP, Zscaler, Cloudflare, AWS WAF, and Check Point Harmony.

Cybersecurity Trainee | Converge Training and IT Services | Feb 2024 – Mar 2024

- Completed practical SOC training in SIEM monitoring, phishing and malware investigation, IOC enrichment, incident response, MITRE ATT&CK mapping, Linux, PowerShell, and networking.

Student IT Assistant | Eulogio "Amang" Rodriguez Institute of Science and Technology | Sep 2022 – Dec 2022

- Supported workstation setup, hardware/software/network troubleshooting, IT documentation, asset management, and end-user assistance.

HANDS-ON CYBERSECURITY PROJECT | WAZUH SOC LAB & DETECTION ENGINEERING

Independent Security Engineering Project | 2026 – Present

GitHub Repository: github.com/jiraviana/Enterprise-SOC-Homelab

Technologies: Wazuh 4.14.x, VMware Workstation Pro, Ubuntu Server, Windows 11, Kali Linux, Microsoft Defender, PowerShell, VirusTotal, MITRE ATT&CK, Linux CLI

- **Wazuh SIEM Administration:** Deployed and administered a self-hosted Wazuh SIEM environment (Manager, Indexer, Dashboard) on Ubuntu Server, configuring networking, agent connectivity, centralized log collection, and security monitoring.
- **Detection Engineering:** Developed and validated custom Wazuh detection rules, including Rule ID 100109 (Level 12), detecting PowerShell command patterns associated with Microsoft Defender impairment, mapped to MITRE ATT&CK T1562.001.
- **Endpoint Security Monitoring:** Configured Windows endpoint monitoring, Windows Event Log collection, Microsoft Defender telemetry, registry monitoring, and File Integrity Monitoring (FIM) to investigate suspicious activities.
- **Threat Detection & Intelligence:** Integrated VirusTotal for threat intelligence enrichment and performed controlled EICAR and PowerShell detection simulations to validate security alerts and detection effectiveness.
- **SIEM Troubleshooting & Optimization:** Troubleshot Wazuh JSON decoder limitations, rule matching, configuration issues, and alert processing to improve detection reliability and monitoring visibility.
- **SOC Lab Development:** Building toward advanced detection capabilities involving Sysmon, PowerShell logging, event correlation, Suricata IDS, threat hunting, active response, and vulnerability management.

Core Competencies: Wazuh SIEM Administration | Detection Engineering | Custom SIEM Rules | Security Monitoring | Log Analysis | Incident Investigation | MITRE ATT&CK | Threat Detection Validation | Endpoint Telemetry | Linux Administration | Threat Intelligence Integration

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

CCNA (Cisco Certified Network Associate) | ISC2 Certified in Cybersecurity (CC) | Cisco Introduction to Cybersecurity | Fortinet NSE 1 and NSE 2 | Palo Alto Networks Certified Cybersecurity Practitioner

CompTIA Security+ — In progress (not yet certified)
